Subject: Volunteer Light Commission

To whom it may concern,

My name is Tom Veilleux. I have been a resident of the town for a year and half. In that time ,I have been interested in finding a way to get involved civically.I take a particular interest in the light commission as my experience is in running Electrical projects for government and private contractors .I have a long history of working in the electrical industry. My father was a small electrical contractor. After growing up in his business and obtaining my Masters license I went on to work in heavy industry. I have spent time building everything from oil rigs, to power stations, to canning coca cola. I Currently work for Interstate Electric and head their industrial controls department. I am hoping a small power company is somewhere my expertise may be a good addition to the people who are running this endeavor.

In addition to my electrical experience I was the President of my homeowners association for four years and vice president of the lake association during the same concurring four years. I found these experiences gratifying, rewarding, hard work and also educational. My former position in Minnesota I was an administrator for the state specializing in the electrical rehabilitation and upkeep of the wastewater treatment facilities for the cities of St Paul and Minneapolis. This experience helped me grasp government expenditures and the humility and responsibility you have to the community you serve. I cannot tell you how much my wife and I enjoy living here. Meeting the great people around my neighborhood and this community.I hope to give back a little with my experience Thank you for your consideration
